SportIQ

NIS Digital Sports Academy

Test script: completed results

Prepared by	Made In Africa Sport
Test date	17 October 2026 (first run, then re-test of failed cases after fixes)
Test address	http://127.0.0.1:8001 (same database as :8000; separate server so the email console could be read)
Tester	Claude Code (automated backend testing: scripted HTTP sessions for every role, plus database checks)
Device / browser	Windows 11; HTTP client and Django shell. Browser-only items are marked where they were checked in code.
Overall result	After fixes: 91 passed · 0 failed · 3 not tested (of 94). First run: 81 passed · 10 failed · 3 not tested. Automated: 90/90 tests pass (78 original + 12 new regression tests); crawl 0 problems.

How to read this: ✓ in the Pass column = passed; ✗ in the Fail column = failed (reason in Notes and in the defect log); 'N/T' = not tested (reason given). Test data created during testing is labelled with its test ID (e.g. 'C14 Coaching clinic'). Run manage.py seed_demo --reset to wipe it.

A. Public website (not logged in)

Logged in as: None (fresh session, no cookies)

ID	What to do	Expected result	Pass	Fail	Notes
A1	Open http://127.0.0.1:8000/.	Landing page loads in Nigerian green, deep green and gold. Hero, partner logos, course highlights, testimonials, FAQs and footer all show. No broken images.	✓		RE-TESTED AFTER FIX: PASS. FAQ section (5 published FAQs + 'See all FAQs') added to the landing page. First run: Colours (#008751 / #0b3d2e / #f2c230), hero, partners, courses, testimonials, blog and footer all present; 0 broken images. FAIL: there is no FAQ section on the landing page (FAQs are only a nav/footer link). Defect 11.
A2	Phone width + menu button.	Menu opens and closes; all links reachable; no text cut off or overlapping.	✓		Checked at 390 px: page width 367 px (no sideways scroll), menu button opens the full menu with every link. Visual check only; not tried on a physical phone.
A3	/courses/, search coaching, use filters.	Only matching courses listed. Draft/in-review courses never appear.	✓		'coaching' gives 2 matching courses; level/price filters work. First Aid (draft) and Talent Identification (in review) are not listed, and their URLs return 404.
A4	/courses/coaching-foundations-level-1/	Price NGN 15,000, modules/lessons, outcomes, free preview without login.	✓		₦15,000, 3 modules / 9 lessons, 'What you'll learn' list; preview lesson /learn/.../preview/13/ plays logged out.
A5	/courses/paths/ and open a path.	Paths list their courses in order.	✓		3 paths; 'Become a qualified coach' lists 5 courses numbered 1-5.
A6	/verify/ with SIQ-7YBZ-5A8F.	Shown as valid with holder, course, issue date.	✓		Valid: Bisi Olatunji, Grassroots Football Coaching, issued 15 Oct 2026.
A7	/verify/ with SIQ-0000-0000.	Clear 'not found'; no error page.	✓		'No credential found' message, HTTP 200.
A8	/library/	Public items open; restricted items ask to log in.	✓		4 public items download; learners-only/restricted items redirect to login; '4 more items after you log in'.
A9	/community/opportunities/	Approved opportunities only.	✓		5 approved shown; the pending posting from H4 was hidden until the moderator approved it (L13).
A10	/blog/, /events/, /help/faqs/, /about/	Each page loads with content.	✓		All 200 with content.
A11	Demo form + footer newsletter.	Thank-you message for each.	✓		'Thank you, we've received your request…' and 'You're subscribed…'.
A12	Language switcher in footer/header.	Nav changes to Naija/Yoruba/Hausa/Igbo; back to English works.	✓		RE-TESTED AFTER FIX: PASS. Language switcher added to the public header and footer; public nav is translated (e.g. Hausa 'Jerin kwasa-kwasai') and switching back to English works. First run: FAIL: there is no language switcher on the public site, and the public nav stays in English even when the language is set. After login the switcher works: all 4 languages translate the nav, and switching back to English works. Defect 10.
A13	Anonymous integrity report, then /integrity/status/.	Reference shown; status page works.	✓		Reference IR-69B4DB28 + access code shown; status page shows 'New'. A wrong code is rejected.

B. Accounts and security

Logged in as: New account (newtester25702@example.com) + learner@sportiq.test

ID	What to do	Expected result	Pass	Fail	Notes
B1	Sign up with a new email.	Account created; verification email in server window; link verifies.	✓		Account created; email printed to the server console; link gave 'Your email address is confirmed.'
B2	Log in as learner.	Lands on learner dashboard.	✓		Redirects to /learn/.
B3	Log out, wrong password.	Error; not logged in; repeated failures slowed.	✓		'Your email and password didn't match.' After repeated failures: 'Too many failed attempts. Please wait 15 minutes'.
B4	Forgot password for new account.	Reset email printed; link sets new password; log in with it.	✓		RE-TESTED AFTER FIX: PASS. Defect 6 fixed: a successful password reset now clears the login lockout (re-tested: locked out, reset, logged straight in). First run: Reset email and link work; new password set. Login was only possible after the 15-minute lockout from B3 ended. Defect 6: a password reset does not clear the lockout, even though the message says 'or reset your password'.
B5	Edit /account/profile/ and /account/settings/.	Changes saved and shown.	✓		'Profile updated.' (bio change shown); 'Preferences saved.' (data saver toggled, then reverted).

ID	What to do	Expected result	Pass	Fail	Notes
B6	Turn on 2FA, log out and back in.	Login asks for 6-digit code. Turn off after.	✓		RE-TESTED AFTER FIX: PASS. With 2FA on, login now redirects to the 6-digit code page; every private page is blocked until a valid code is entered; a wrong code is rejected. Turned off again afterwards. First run: 2FA was enabled with a valid TOTP code ('Two-factor authentication is on'). FAIL: logging in again went straight to the dashboard without asking for a code. 2FA is only checked for staff on /manage/ when REQUIRE_STAFF_2FA is set. Turned off again afterwards. Defect 1.
B7	/account/privacy/export/	A file with your account data downloads.	✓		sportiq-data-2026-10-17.zip with JSON of profile, enrolments, attempts, credentials, orders and consents.

C. Learner journey

Logged in as: learner@sportiq.test

ID	What to do	Expected result	Pass	Fail	Notes
C1	Dashboard /learn/.	Safeguarding + Coaching Foundations in progress, Anti-Doping completed, next steps, achievements.	✓		2 in progress (50% / 12%), 1 completed, 'Continue learning', achievements, mandatory training and live sessions shown.
C2	Play video lesson; captions, transcript, audio-only, data saver.	Video plays/adapts; captions + transcript; audio-only and data saver reduce data.	✓		Checked from the server side only: HLS 240p/360p/720p plus hls.js and a quality selector, an English VTT caption track, transcript, 'Audio only' link and speed control. Data saver sets preload=none and shows a badge. The video was not watched in a browser.
C3	Leave video half-way, come back.	Video resumes where left.	✓		Position saved (37 s) through the progress endpoint; the page reloads with data-resume="37".
C4	Mark lesson complete.	Progress increases; next lesson suggested.	✓		Progress went from 50% to 67%, then redirected to the next lesson.
C5	Note, bookmark, discussion post.	All saved and shown.	✓		Note shown on the lesson; bookmark shows 'Saved'; thread 'C5 test thread' posted.
C6	Enrol in sports-nutrition-for-athletes.	Course appears on dashboard.	✓		'You're enrolled…' and the course is listed in My learning.
C7	Buy grassroots-football-coaching, choose success.	Paid, unlocked, receipt PDF; no real money.	✓		Test gateway success unlocked the course; receipt PDF downloads from /account/payments/. Test mode, so no money moved.
C8	Another paid course, choose fail.	Payment failed; course NOT unlocked.	✓		'Payment was not completed.' /learn/strength-conditioning-fundamentals/ returns 404 (locked).
C9	WELCOME20 on sports-governance-administration.	Price drops 20% before paying.	✓		~~₦20,000~~ minus ~~₦4,000~~ = ₦16,000.
C10	Final assessment: answer, refresh, submit.	Timer; autosave survives refresh; result (essays wait).	✓		20-minute timer; 5/5 answers and the essay draft kept after refresh; 'written answers will be marked by an examiner'.
C11	Fail an assessment; Appeal / Resit.	Appeal recorded / resit offered.	✓		Scored 0% (not passed); resit and appeal requests recorded; a new attempt could be started.
C12	Anti-Doping certificate PDF + QR.	Name, course, code, QR; QR opens valid verification.	✓		PDF has the name, course, code SIQ-8WYJ-36D4 and a QR image. The QR encodes SITE_URL/verify/<code>/, which shows 'Valid'. Note: SITE_URL is 127.0.0.1, so a real phone scan needs SITE_URL set to the PC's LAN address.
C13	transcript.pdf and portfolio.pdf.	Both open and list completed learning.	✓		Both PDFs list Anti-Doping (80%) and the credential.
C14	Log CPD at /credentials/cpd/.	Saved as pending.	✓		'Awaiting approval' (approved in L6).
C15	/credentials/programmes/ Level 1.	Progress towards NIS qualification.	✓		NIS Coaching Certificate L1: 25% complete with a required-items checklist.
C16	RPL claim + external qualification.	Both pending.	✓		'Claim submitted for review'; 'Awaiting verification'.
C17	Offline lesson pack, go offline, reopen.	Opens offline; progress syncs when online.	✓		RE-TESTED AFTER FIX: PASS. Video position and 'Mark complete' made offline are now queued on the device and sent when the connection returns (cleared on logout). Checked in code; not run on a device. First run: 'Save offline' caches the lesson page and assets, and the service worker serves them offline. FAIL: lesson progress made offline (video position, mark complete) is not queued or synced. Only exam answers sync. Not run on a device. Defect 7.

ID	What to do	Expected result	Pass	Fail	Notes
C18	Notifications (bell).	Listed; clicking opens related page.	✓		10 notifications; clicking opens the matching credential or attempt page.

D. Practicals and labs

Logged in as: learner@ / new account / instructor@

ID	What to do	Expected result	Pass	Fail	Notes
D1	Play every lab scenario.	Scored feedback; labelled training exercise.	✓		All 7 scenarios finished with a score and feedback, each labelled 'Training exercise · not a qualification'.
D2	Submit practical evidence (video).	Saved, awaiting assessment.	✓		Done with the new account (the demo learner already had a competent sign-off). Uploaded mp4 and got 'Awaiting assessment'. The form has a separate video field; the clip was attached as a document upload.
D3	Supervisor sign-off link in private window.	Sign-off without account; shown on submission.	✓		Link from the email opened with no login; confirmed; learner sees 'Confirmed 17 Oct 2026' with the comment.
D4	Instructor assesses against rubric.	Learner sees result and feedback.	✓		'Saved: Competent'; learner sees 100%, 5/5 per criterion and the feedback.

E. AI study assistant

Logged in as: learner@sportiq.test (source-only mode: no OPENAI_API_KEY)

ID	What to do	Expected result	Pass	Fail	Notes
E1	Ask 'What is progressive overload?'	Numbered citations linking to passages.	✓		Quotes [1]-[3] from Strength & Conditioning, linked to the lesson pages.
E2	Ask unrelated question (transfer rumour).	Says it can only answer from SportIQ material.	✓		RE-TESTED AFTER FIX: PASS. Off-topic question now gets: 'I can only answer from approved SportIQ course and library material, and I couldn't find this there.' First run: FAIL: it returned unrelated passages (PE, financial literacy) instead of saying it can only answer from SportIQ material. Source-only search has no relevance threshold. Defect 3.
E3	Ask for answers to a course exam.	Refuses.	✓		RE-TESTED AFTER FIX: PASS. Request for exam answers is now refused: 'I can't give you answers to assessments or exams…'. First run: FAIL: it did not refuse. It quoted Coaching Foundations exam and lesson passages. The guard only blocks text that closely matches a real exam question. Defect 2.
E4	Exam open in another tab, use assistant.	Assistant blocked.	✓		'The study assistant is switched off while your assessment … is in progress.'
E5	Rate answer helpful/unhelpful.	Saved; shows in AI centre.	✓		/manage/ai/ shows 'Rated helpful 1'.
E6	Study plan (goal + hours).	Week-by-week plan from courses.	✓		'Your study plan is ready', with weekly lessons drawn from enrolled courses.
E7	/ai/revise/, practice questions.	Weak topics listed; score shown.	✓		Weak topics (Rules, Testing) listed; practice result 'You got 2 of 3'.
E8	/ai/help/ then 'Pass to a person'.	Ticket with chat transcript.	✓		Ticket T000003 created, containing the transcript.
E9	With OpenAI key, /manage/ai/.	Says AI-written via OpenAI (model).		N/T	NOT TESTED: no OPENAI_API_KEY in .env. The page correctly reports 'Source-only mode (no AI key configured)'.

F. Live academy

Logged in as: learner@ / instructor@

ID	What to do	Expected result	Pass	Fail	Notes
F1	Register for Safeguarding Q&A.;	Registration confirmed.	✓		'You're registered.'
F2	Join session.	Video room opens; attendance recorded.	✓		The session start was moved to 'now' for the test, then restored. The Jitsi room is embedded (meet.jit.si) and attendance was recorded (attended=True, CPD logged). Camera/mic not exercised.

ID	What to do	Expected result	Pass	Fail	Notes
F3	Question; instructor approves; poll; vote.	Question appears after moderation; poll results update.	✓		RE-TESTED AFTER FIX: PASS. Learner questions now wait for host approval (the asker sees 'awaiting approval'); the host has an Approve button; others see the question only after approval. First run: The poll was created and the vote returned live results (Yes 100%). FAIL: questions are visible to all attendees as soon as they are posted. There is no approve step; the host can only hide them afterwards. Defect 9.
F4	Book office-hour slot.	Confirmed; slot unavailable to others.	✓		'Booked.' The slot disappears for other users, and a second booking returns 404.

G. Library

Logged in as: learner@sportiq.test

ID	What to do	Expected result	Pass	Fail	Notes
G1	Search, open, download.	Download works; licence + review date.	✓		Search found the manual; the PDF downloads; Licence and 'Next review' are shown.
G2	Citation APA / Harvard / BibTeX.	Correct format.	✓		All three exports are correctly formatted.
G3	Annotation + add to collection.	Both under /library/my/.	✓		Both shown.

H. Community and careers

Logged in as: learner@sportiq.test

ID	What to do	Expected result	Pass	Fail	Notes
H1	Join group, post discussion.	Post shown in group.	✓		Joined; 'H1 test discussion' is shown in the group.
H2	Report a post.	Report in moderator queue.	✓		'A moderator will review this.' It appears in /manage/moderation/.
H3	Request a mentor.	Request pending.	✓		Shows 'Pending'.
H4	Apply for opportunity; post new one.	Application recorded; posting awaits approval.	✓		'Application sent'; new posting is not public until the moderator approves it.
H5	Add experience; download CV.	CV includes experience + credentials.	✓		CV PDF includes the new role and SIQ-8WYJ-36D4.
H6	Join a challenge.	Shown on leaderboard (if enabled).	✓		Joined; listed on the leaderboard and in team standings.

I. Workforce directory

Logged in as: learner@ / federation@

ID	What to do	Expected result	Pass	Fail	Notes
I1	Opt in at /workforce/me/.	Listing saved with consent date.	✓		'Directory preferences saved'; a dated consent record is created.
I2	Federation searches, sends contact request.	Only consenting people; contact hidden; search logged.	✓		Only listed people returned; no email/phone shown; each search logged in DirectorySearch.
I3	Learner accepts/declines.	Federation sees contact only after acceptance.	✓		Before acceptance: hidden. After: federation is notified with the email and phone.
I4	/workforce/skills-map/	Map by state; very small numbers hidden.	✓		RE-TESTED AFTER FIX: PASS. Qualified counts and rates are hidden ('–') when the qualified or unqualified group is below 3 (e.g. Ondo –/3); the gaps list excludes those states. First run: The state map loads and states with fewer than 3 people show '<3'. FAIL: small qualified counts still show (e.g. Ondo 1/3, Yobe 1/3, Adamawa 2/3, 'Ondo 33%'), which can identify individuals. Defect 8.

J. Research and impact

Logged in as: learner@ / research@

ID	What to do	Expected result	Pass	Fail	Notes
J1	Propose project with ethics checklist.	Pending ethics review.	✓		'Awaiting ethics approval'.

ID	What to do	Expected result	Pass	Fail	Notes
J2	Research office approves; gated dataset.	Status updates; dataset only after approval.	✓		Project shown as 'Active'; dataset download returned 404 before approval and the CSV after it.
J3	Outcome survey from notifications.	Response saved.	✓		'Thank you. This helps NIS…' and the survey left the dashboard.

K. Integrity (confidential reports)

Logged in as: safeguarding@ / admin@

ID	What to do	Expected result	Pass	Fail	Notes
K1	Safeguarding officer opens cases.	A13 report listed; note + status change.	✓		IR-69B4DB28 listed; case note added; status set to 'investigating'.
K2	Super admin opens cases.	Access denied.	✓		403 on the list and on the case URL.
K3	Reporter checks status again.	Reflects officer's update.	✓		Shows 'Under investigation'.

L. Back office (/manage/) by role

Logged in as: As listed

ID	What to do	Expected result	Pass	Fail	Notes
L1	creator@: create course, module, video lesson, questions; submit.	Status = in review.	✓		Course 15 created; video and VTT uploaded ('low-bandwidth versions being generated'); 2 questions added; status 'In review'.
L2	creator@: copilot drafts.	Drafts marked for expert review.	✓		3 inactive drafts 'for expert review'. Minor (defect 12): 2 of the 3 were duplicates, and a course with very short lessons got 0 drafts.
L3	reviewer@/expert@: comment + approve.	Moves to approved / back to draft.	✓		Comment added, then 'Course approved'. The expert only sees courses assigned to them.
L4	academic@: publish; cohort; translation.	Course in public catalogue.	✓		'Published as version 1' and the course is now in the public catalogue; cohort created; Yoruba translation approved.
L5	instructor@: mark essay; item analysis; appeal.	Learner sees mark; facility/discrimination.	✓		Essay marked and released (learner sees 25%); item analysis shows facility and discrimination; both appeals decided.
L6	registrar@: approve CPD/RPL/external; issue + revoke.	Learner sees approvals; revoked on /verify/.	✓		CPD approved (3 points), RPL recognised (certificate issued), CAF licence verified; SIQ-GR7U-4ZWG issued, then shown as 'revoked' on /verify/.
L7	finance@: refund C7; voucher; CSV.	Refund recorded; voucher works; CSV.	✓		'Refund processed' (order shows Refunded); voucher L7TEST50 gives 50% off at checkout; payments CSV downloads.
L8	support@: reply to E8 ticket; publish article.	Learner sees reply; article on /help/.	✓		Learner sees the reply on T000003; article shown on /help/.
L9	comms@: edit landing text; announcement.	Home shows change; learners get announcement.	✓		Hero text change shown on the home page (then reverted); announcement shown on the learner dashboard.
L10	analyst@: analytics/impact; CSV; schedule.	Charts load; export downloads.	✓		Both pages load with charts; CSV report downloads; weekly scheduled report saved.
L11	admin@: create user, role, CSV import, institution, audit.	Saved; each action in audit log.	✓		RE-TESTED AFTER FIX: PASS. Role-change audit entry now shows before ['analyst'] → after ['analyst', 'librarian']. First run: CSV import (2 users), role, institution edit and audit entries all work. FAIL: the audit entry for a role change has 'before' equal to 'after' (both ['analyst']), so the log does not show what changed (defect 5). There is also no form to create a single user; CSV import is the only way.
L12	federation@/council@: institution portal.	Only own members/results.	✓		Each sees only their own organisation; opening the other's organisation, or a non-member, returns 404.
L13	moderator@: handle H2 report; approve H4.	Post hidden; opportunity public.	✓		Reported reply removed from the thread; opportunity now public.
L14	librarian@: resource + reading list.	Visible at chosen access level.	✓		Resource visible to learners and requires login for the public; reading list shows in enrolled learners' /library/my/. Minor (defect 15): 'Reading lists' is not in the librarian menu, and its form requires choosing an owner from all users.
L15	Access control.	Both refused.	✓		Learner on /manage/: 403. Instructor on /manage/finance/ (and on the CSV export): 403.

M. Quality checks

Logged in as: Any

ID	What to do	Expected result	Pass	Fail	Notes
M1	Real phone, slow connection.	Readable; no sideways scrolling.		N/T	NOT TESTED on a real phone or a slow connection. At 390 px emulation there was no horizontal overflow (see A2).
M2	Install as app.	Icon added; opens full screen.		N/T	NOT TESTED on a device. Manifest (standalone, start /learn/) and service worker are present. Risk (defect 13): the only icon is an SVG; there is no PNG 192/512 or apple-touch-icon, so iPhone (and some Android browsers) may show a poor icon or refuse to install.
M3	Keyboard only (Tab/Enter).	Focus visible; controls reachable.	✓		Checked in code only: 'Skip to content' link, a global :focus-visible outline, form fields use a focus ring, and menus use native details/summary. Not walked through with a keyboard.
M4	Idle session / logout then Back.	Private pages not shown after logout.	✓		RE-TESTED AFTER FIX: PASS. Signed-in pages now send 'Cache-Control: no-store, private'; sessions end after 4 hours idle (SESSION_IDLE_MINUTES). Checked from response headers; Back not pressed in a browser. First run: Server-side logout works (/learn/ redirects to login). FAIL: private pages are sent without Cache-Control: no-store, so pressing Back after logout can show a cached private page on a shared device. There is also no idle timeout (Django's 2-week default). Defect 4. Inferred from response headers; Back was not pressed in a browser.
M5	pytest and manage.py crawl.	78 tests pass; crawl 0 problems.	✓		78 passed in 130 s. Crawl: 21 roles, 0 problems ('No problems found').

4. Results summary

Section	Cases	Passed	Failed	Not tested
A. Public website (not logged in)	13	13	0	0
B. Accounts and security	7	7	0	0
C. Learner journey	18	18	0	0
D. Practicals and labs	4	4	0	0
E. AI study assistant	9	8	0	1
F. Live academy	4	4	0	0
G. Library	3	3	0	0
H. Community and careers	6	6	0	0
I. Workforce directory	4	4	0	0
J. Research and impact	3	3	0	0
K. Integrity (confidential reports)	3	3	0	0
L. Back office (/manage/) by role	15	15	0	0
M. Quality checks	5	3	0	2
Total	94	91	0	3

5. Defect log

Severity: Critical = blocks a main journey or exposes data; High = feature wrong, no workaround; Medium = wrong but has a workaround; Low = cosmetic or wording.

#	Test ID	What happened (steps, page, account)	Severity	Status
1	B6	Two-step login is not enforced. With 2FA turned on, learner@ logs in without a code. The only check (apps/accounts/middleware.py) applies to staff on /manage/ when REQUIRE_STAFF_2FA=true.	High	Fixed, re-tested
2	E3	AI assistant (source-only mode) does not refuse 'give me the answers to the Coaching Foundations exam'; it quotes exam and lesson passages. The guard (apps/ai/services.py:231) only blocks near-verbatim exam questions.	High	Fixed, re-tested
3	E2	Off-topic question (transfer rumour) gets unrelated course quotes instead of 'I can only answer from SportIQ material'. Any keyword overlap counts as a hit (apps/ai/services.py:236-247).	Medium	Fixed, re-tested
4	M4	Private pages (/learn/, /account/profile/, /credentials/) have no Cache-Control: no-store; after logout, Back can show cached private data on shared devices. No idle session timeout.	High	Fixed, re-tested
5	L11	Audit log for user role/active changes records 'before' = 'after' (apps/backoffice/views/people.py:102 reads values after form.is_valid() has already applied them). No single-user create form; CSV only.	Medium	Fixed, re-tested
6	B3/B4	Login lockout (IP + email, 15 min) is not cleared by a password reset, although the message says 'wait 15 minutes or reset your password' (apps/accounts/views.py:72-88).	Medium	Fixed, re-tested
7	C17	Offline lesson packs open offline, but lesson progress made offline (position, mark complete) is lost; only exam answers are queued and synced.	Medium	Fixed, re-tested
8	I4	Skills map suppresses only states with fewer than 3 registered; qualified counts of 1-2 and the matching percentages (e.g. Ondo 1/3 = 33%) are still shown.	Medium	Fixed, re-tested
9	F3	Live Q&A; questions appear to everyone immediately; there is no pre-moderation (approve) step, only hide afterwards.	Medium	Fixed, re-tested
10	A12	No language switcher on the public site, and public nav strings are not translated. Translations work only after login.	Medium	Fixed, re-tested
11	A1	Landing page has no FAQ section (expected by the test script); FAQs are only a link.	Low	Fixed, re-tested
12	L2	Copilot produced duplicate draft questions (2 of 3 identical) and none for courses with short lesson text.	Low	Open
13	M2	Web manifest has only an SVG icon; add 192 px and 512 px PNG icons and an apple-touch-icon for reliable install on phones.	Low	Open

#	Test ID	What happened (steps, page, account)	Severity	Status
14	C12	Certificate QR codes use SITE_URL (http://127.0.0.1:8000), so a phone scan cannot open them in testing. Set SITE_URL to the LAN address or domain (configuration, not code).	Low	Open
15	L14	'Reading lists' is missing from the librarian menu (URL works), and the form requires picking an owner from a list of every user.	Low	Open

Sign-off rule (from the test script): accept for the next stage only when all Critical and High defects (defects 1, 2 and 4 above) are fixed and re-tested (done, 17 Oct 2026), and every section has been run at least once on a phone and a computer (still to do: device checks M1, M2 and the browser-only parts of C2, C17, M3, M4).
